ON-SITE SERVICE SUPPORT THAT IS AFFORDABLE, RELIABLE AND PROFESSIONAL BY CERTIFIED TECHNICIAN.

For your convenience, I offer effective on-site group or private one-on-one instructional computer and technical training. Private training in the comfort of your own home rather than a classroom allows you to relax and thereby absorb and retain more information.

Technical training is also available, learn how to disassemble and reassemble a computer and identify its internal components. Learn how to build a computer from scratch, and troubleshooting techniques.

Private training is absolutely embarrassment and pressure free! As a computer instructor for adult continuing education, I'm understanding and patient to your individual learning needs. Learn at your own pace... confidently.

Seeking certification? I can prepare you to take the CompTIA A+ certification exams.

Many of us these days enjoy the simplicity of digital photography but don't back up our files. Let me show you how you can back up your important digital images so you never need to worry about disaster striking and losing your important photographs!

File / Printer Sharing

File and printer sharing allows you to share the contents of selected folders and locally attached printers with other computers on the network.

Network Security

Security Management for networks is different for all kinds of situations. A small home or an office would only require basic security while large businesses will require high maintenance and advanced software and hardware to prevent malicious attacks from hacking and spamming.

Custom Built Machines

Custom built servers and workstations save you big bucks by being configured to your needs.

Repairs / Troubleshooting

On-site service repair and troubleshooting of hardware, software and the network.

Web Hosting & Design

Web hosting and e-business solutions for small to medium sized business.

Troubleshooting and Cause Assessment

I'll perform a series of system checks and diagnostics to find your computer problem. Once the problem is believed to be found, I'll suggest the best solution and make suitable recommendation.

PC Tune

Designed for users experiencing slower start up or operating speeds. If your PC seems to be getting sluggish as time goes by it could be due to malware. Let me diagnose and repair your PC!

File and Print Sharing

Want to share a printer between multiple computers in your home? Interested in sharing files between two PCs or laptops? I can set up printer and file sharing capabilities for you.
