Fast, Reliable Support

More than just computer support, I act as your entire IT department. I'll help facilitate the management of all your IT needs. From communicating with your software vendor, Phone Company, Internet provider, or webhost, I'll help you concentrate on running your business.

Systems Analysis & Design

I'll inspect your current systems and design an upgrade plan based on your future goals and IT infrastructure. I can implement upgrade plans in stages to accommodate your budget.

Network & PC Installation

I'll install new equipment to meet the specifications outlined in our review of your systems. I'll also make recommendations to upgrade any old equipment to ensure your entire network runs smoothly so your staff can perform their duties without computer delay. Computer down time is not cost effective.

PC Optimization & Tuning

I address your existing PC problems and bring your computers up to their best performance level. Yearly PC Tune-ups will be performed on all maintained systems, keeping them up-to-date and virus, adware, and spyware free.
