NETWORK ADMINISTRATION, IT PROJECT MANAGEMENT NETWORK SECURITY, EXCHANGE SERVER, REMOTE ACCESS AND MORE

Network Administration

Your network is supported and maintained as though I'm there as your full time network administrator eliminating the worries of employee turn-over and having to train new IT personnel on your business systems. Easily add, disable or delete users eliminating the need to hire an additional IT professional to support growth.

Routine software update checks, Operating System and file structure related services. Support of hardware and software. Network security and virus protection. Create, monitor and maintain a backup strategy. Monthly PC tune-ups performed on all maintained systems aiding in keeping them up-to-date and virus & spyware free.

Networking support contracts are a fraction of the cost of hiring a full time employee. And you don't have the cost of additional training of current technology changes.

IT Project Management

Custom support regarding hardware or software purchases to accomplish specific tasks or business goals.

Network Security

Security Management for networks is different for all kinds of situations. A small home or an office would only require basic security while large businesses will require high maintenance and advanced software and hardware to prevent malicious attacks from hacking and spamming.

Exchange Server Installation

Exchange Server is a messaging and collaborative software product and is widely used by enterprises using Microsoft infrastructure solutions. Exchange's major features consist of electronic mail, calendaring, contacts and tasks; support for mobile and web-based access.

Work from Home or On The Road Access

Remote access gives network users the capability to connect remotely to access the files they need while at home or on the road.

File / Printer Sharing

File and printer sharing allows you to share the contents of selected folders and locally attached printers with other computers on the network.

Custom Built Machines

Custom built servers and workstations save you big bucks by being configured to your needs.

Outlook Web Access

With Office Outlook Web Access, you can use a Web browser to access your Microsoft Exchange Server mailbox from any computer with an Internet connection.

Repairs / Troubleshooting

On-site service repair and troubleshooting of hardware, software and the network.

Web Hosting & Design

Web hosting and e-business solutions for small to medium sized business.

General services are usually delivered within a 1 to 4 hour timeframe during normal business hours, 10am to 5pm, Monday through Friday. Emergency response is available upon request.

24 Hour Emergency Service – After hours onsite service is from 5pm to 10am, Monday through Friday, and all day (24/7) Saturday & Sunday. Emergency service is delivered within a two to four hour timeframe. Additional fees may be billed for 24 Hour Emergency Services.
